

# STAR GAZING WORKSHOPS

On 11<sup>th</sup> January 2022, we held our first ever St. Charles Star Gazing workshop. It was so popular that we needed to add another date (8th February) to offer this opportunity to other children (and parents). Unfortunately, on both days the sky was cloudy so instead of looking at the sky, we did lots of activities linked to SPACE. We created our own FRUIT SOLAR SYSTEM and set out the 'planets' to explore distances between them. We also tested some rockets! We learned a lot but we also had a lot of fun!!!

Have a look at our video clip from the events.
